SUMMARY

B.Tech Computer Science graduate with a solid foundation in programming, data structures, and software development principles. Proficient in Java, Python, HTML, CSS, and JavaScript, with hands-on experience in building simple web applications as part of academic and personal projects. Familiar with core Data Structures and Algorithms, Operating Systems, SQL (MySQL), and the Software Development Life Cycle (SDLC). Comfortable with version control using Git and have basic exposure to modern web development frameworks. Eager to contribute to real-world projects, continuously learn, and thrive in a collaborative software development environment.
